If reference to EIP, you are correct this is what you have to do in order for the EIP to stay free. When not in use you are being charge for holding an IP not in use.

As long as your instance is a free-tier instance and is running 24/7, you should be fine.

Best,
Anthony J Souza

Subject: Re: CSC 648-848 Fall 2022 Team 4

Hello Prof. Souza,

Thank you for the grading.

I had a question regarding AWS EC2 instance. Currently we have kept the EC2 instance running at all times as we have used Elastic IP (EIP). The problem with EIP is that it costs us if the EIP is not attached to any instance. So, if we stop the instance the EIP will cost us. Therefore, as of now we have kept the instance running and the EIP attached to it and thus, it doesn't cost anything.

I'd like to ask if this is the correct way or any guidance on this will help.

Thank you so much.

Regards,
Mahisha (Team 04 Lead)

Hello Team 04,

Everything look good for Milestone 0.

Milestone 0 Grade : 10/10

Best,
Anthony J Souza

Hello Class CEO and CTO,

Our team (Team 4) has completed Millstone 0 and is ready for grading.

Link to application: <http://54.200.101.218/>

Link to GitHub Repo: <https://github.com/CSC-648-SFSU/csc648-03-fa22-team04>

Also, our team has correctly populated the credentials folder.

We are looking forward to your feedback.

Regards,
Team 4 <Mahisha Patel>
